

Your Source for Aggregate and Hauling Operations

Quarry Services, LLC

Quarry Services (QS) is dedicated to managing aggregate mining and hauling operations for quarries in the northwestern United States. QS is built on over 20 years of extensive aggregate mining, reclamation, trucking and heavy equipment operations experience in Montana, Iowa, Washington and Oregon. Our main goals are to operate every customer site with safety, precision, and honesty. Quarry Services' range of equipment, industry knowledge and experienced workforce, along with continuous maintenance and training, makes us a top choice.

Experience and Equipment

QS currently manages limestone hauling operations for the Graymont Limestone Quarry in Townsend, MT. QS handles approximately 1.5 million tons of limestone for Graymont yearly. The quarry can produce 300 tons of lime per day. High purity limestone from the quarry is trucked to a crushing plant where it is sized and conveyed to a large storage pile. QS manages bulk truck loading operations at the plant site and hauls lime from the plant to Graymont's 1,500 ton rail terminal. QS also provides grading and reclamation services at the site.

Ample heavy equipment is owned and operated by Quarry Services to handle extensive raw materials. Equipment includes:

- **Trucks and Trailers**
 - **Pneumatics**
 - **Belly-Dumps**
 - **Side-Dumps**
- **Loaders**
- **Mixing Trucks**
- **Hydraulic and Walking Excavators**
- **Dozers**

QS is dedicated to helping quarries become more efficient and profitable. If you have an existing quarry that needs additional help, CALL US. We'll take away operational worries, reduce costs and bring safety, integrity, experience and operational excellence to your site.
